Daniel Ejiofor

DATA ENGINEERING | ANALYTICS PLATFORMS | APPLIED AI

Redmond, WA | github.com/ejiod2025 | linkedin.com/in/ejiod

Data and analytics engineer with more than 10 years of experience across retail, financial services, energy, and healthcare. Builds reliable batch and streaming platforms, modernizes legacy pipelines, and connects operational data to business decisions. Experience also includes voice AI, speech evaluation, and AI-assisted operational triage.

PROFESSIONAL EXPERIENCE

Senior Analytics Engineer | Top Supply Chain Industry

February 2026 - Present

- Own end-to-end data movement across **18 enterprise source systems** supporting supply-chain reporting and analytics.
- Migrated **legacy infrastructure to cloud native platforms**, combining Java development with cloud workflow orchestration.
- Built batch and streaming integrations with **Java, Flink, and Kafka**, alongside lakehouse pipelines with validation and recovery controls.
- Led a unified warehouse analytics platform that helped teams identify invalid cartons and recover missing inventory. Built AI agents to support investigations.
- Corrected item-preparation overcounting to improve warehouse reporting; supported data-quality and release standards.

Lead AI Engineer | SiriusMed

October 2024 - January 2026

- Developed voice-enabled EMR workflows and a WhatsApp medication-adherence prototype.
- Worked on Yoruba speech recognition with Python, PyTorch, and Whisper, including audio preprocessing, experiment tracking, and WER/CER evaluation.

Senior Data Analytics Engineer | NatWest Group

July 2022 - July 2025

- Modernized Oracle-to-Snowflake pipelines, improving archiving performance by **85%**; built Flink/Kafka streaming pipelines that reduced data latency by **45%**.
- Built reusable dbt frameworks and Azure Data Factory workflows with testing, documentation, and governed data models.
- Developed AWS workflows for customer remediation associated with **GBP 1.5 million** in processing savings.

DANIEL EJIOFOR | EXPERIENCE, SKILLS & EDUCATION

EARLIER EXPERIENCE

Senior Data Engineer | Quickcheck

January 2022 - June 2022

- Built multi-source ETL/ELT pipelines and validation controls, improving downstream application performance by **30%**.

Business Insight Data Architect | Engie Energy Access

December 2018 - December 2021

- Integrated data using AWS S3 and Glue, reducing preprocessing time by **40%**; supported governed Tableau reporting.

Lead Data Analyst | mDoc Healthcare

February 2018 - August 2019

- Worked on healthcare and EHR data quality, access, lineage, and auditability.

Data Architect | RealSearch & Partners

August 2014 - January 2018

- Designed data architecture and ETL workflows supporting business intelligence, reducing processing time by **30%**.

TECHNICAL SKILLS

Programming and analytics: Python, Java, SQL, dbt, Tableau

Streaming and storage: Apache Flink, Kafka, CDC, Hudi, Delta Lake, Snowflake, PostgreSQL

Cloud and orchestration: Airflow, Cloud Composer, Google Dataflow, AWS S3 / Glue, Azure Data Factory

Engineering practices: Data contracts, validation, observability, replay and recovery, lineage, CI/CD, Terraform, Liquibase

Applied AI: PyTorch, Whisper, speech recognition, WER/CER evaluation, operational AI agents

SELECTED PUBLIC PROJECT

Warehouse Exception Lab | Python, SQLite
Synthetic carton-event analysis with deduplication, missing/recovered states, SQL join fan-out checks, and automated tests. View project

EDUCATION

Boston University | MSc Computer Science and Artificial Intelligence
In progress

University of Lagos | MSc Cell and Molecular Biology | 2016

University of Jos | BSc Biochemistry | 2013

CERTIFICATIONS EARNED

AWS Certified Data Analytics - Specialty (2023) • Snowflake SnowPro Core (2023)
Microsoft Data Analyst Associate (2021)
